DETAILED ACTION

Status of the application

Amendment after final filed 02/15/2007 is acknowledged. Claims are canceled.

Claims 1-6, 8,9 are canceled.

Claims 7, 10-12 are pending.

Claim 7 is directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(b), claims 10-12, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement as set forth in the Office action mailed on 02/09/2005 is hereby withdrawn. In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the

Art Unit: 1631

provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Claim Rejections - 35 USC § 112, first paragraph.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 11,12 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for treatments of type II diabetes, does not reasonably provide enablement for treatment of all diseases listed in the claims.

The claims are directed to method of treatment of a variety of disorders of unrelated etiologies (e.g., metabolic disorders, pulmonary edema, etc). Specification, p. 15, lines 7-12, cites two publications of Todd et al to demonstrate that uses of GLP-1 in treatment of all diseases as instantly claimed are well known. However, said publications address treatment of one particular disorder, diabetes type II. The disorders listed in the instant claims, such as metabolic disorders, for example, are of different etiologies and can be caused but multiple events unrelated to GLP-1.

The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims.

Conclusion.

Claims 7, 10 are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
